

Understanding the Essentials of Effective Restaurant Fire Protection

With the support of industry experts, Tyco Fire Protection Products, a global leader in the fire suppression industry and manufacturer of the trusted ANSUL brand of fire protection products, offers a wide range of training events to help educate those responsible for ensuring compliant systems are in place.

Attend this [FREE TRAINING SEMINAR](#) and leave with a better understanding of the skills needed to effectively evaluate and inspect restaurant fire suppression systems. Topics include:

- The evolution of restaurant fire suppression technology
- Building fire codes, NFPA standards (10, 96 and 17A), and UL 300 compliance essentials
- Restaurant fire suppression system design requirements
- Best practices for evaluating fire protection for new and unique cooking equipment
- Plan review, certification and acceptance for system design and installation
- Service, inspection and maintenance requirements

Presented by: Sheryl Lemire, Global Product Manager

Sheryl has been with Tyco Fire Protection Products for 40 years and presently serves as the Global Product Manager for ANSUL and PYRO-CHEM brand Restaurant Fire Suppression Systems. She works closely with Global Code Authorities/Authors on interpretations along with new code recommendations across many countries around the world. Sheryl is a member of the National Fire Protection Association (NFPA) and is committee member for NFPA 17, *Standard for Dry Chemical Extinguishing Systems*, and NFPA 17A, *Standards for Wet Chemical Extinguishing Systems*.

Continuing Professional Development (CPD) hours are offered for this class.
